## Foreword

AIRFACTS CHINA RECESSED BATHROOM ACCESSORIES, now grown to be the most extensive line obtainable, and covered by many U. S. Patents, were the first of this type ever manufactured.

Patented: Feb. 13, Aug. 21, Aug. 28, Sept. 4, Sept. 11, Oct. 23, 1917; Feb. 12, May 28, July 16, 1918; and April 15, July 29, 1919.

The Fairfacts Company is undoubtedly the largest of its kind in the world, with all that it implies of experience, facilities and service.

Fairfacts Bathroom Accessories are fitted to modern needs, adequate in all the essentials, and attractive in appearance. That they have profoundly affected, have revolutionized the equipment of the modern bathroom, is demonstrated on every hand.

They are of high-grade china. The special process of manufacture, developed after many years, results in a body and surface finish of the finest quality that is also practically everlasting. The expansion and contraction of the body and surface finish is so nearly equal that no surface cracks or fractures occur.

Sanitary Engineers call china the best and most sanitary material known for bathroom users.

Fairfacts Fixtures are non-absorbent, sanitary and efficient. There is no nickel to polish, no white coating to wear off or chip off. They always retain their spotless appearance, maintaining the high standard of cleanliness now demanded.

The same straight, dignified lines, the same design has been carried out in the various fixtures, as with a fine dinner set; harmonizing with the plumbing fixtures and the straight lines of the tile wall.

These accessories have been widely imitated, but like most imitations, many are of poor quality, and purchasers should protect themselves by insisting upon having genuine Fairfacts Fixtures.

Information on page 4 regarding accessories that are made in various colors.

## Made for Any Type of Wall Construction or Surface Finish

A practical, pleasing sanitary and really satisfactory installation can be made on any type of interior wall construction or surface finish. See Page 3 for methods of setting in the following types of wall:

| INTERIOR CONSTRUCTION      | BOND          | WALL FINISH    |
|----------------------------|---------------|----------------|
| Wood stud                  | Metal lath    | Tile           |
| Terra cotta or hollow tile | Wood lath     | Plaster        |
| Brick                      | Plaster board | Keene's cement |
| Gypsum block               |               |                |
| Metal stud walls (thin)    | Sheetrock     |                |

## Fairfacts Fixtures Should Be Included in the Construction Work and Mentioned in the Tile Specifications

The desirability of building accessories into the walls during the period of construction has been generally recognized. Fairfacts fixtures should be included in the construction work, mentioned in the tile specifications and shown on the drawings.

*Important:* Fairfacts fixtures are sold and installed by tile contractors and should be included in the tile contract, if used on tile finish walls.

## Made in Tile Sizes—Select Proper Size to Fit the Tile

The tiles generally used for walls are made in 6x3, 6x6 and 4 $\frac{1}{4}$ x4 $\frac{1}{4}$ -in. sizes, and Fairfacts accessories are made to fit these unit sizes or their multiples. Care should be exercised to see that the proper sizes are selected to fit the tile, and their installation can be easily made.

## Types of Fairfacts Fixtures and Methods of Installation: Biltin or Recessed Type, Semi-recess Type, and Projecting Type

*Biltin or Recessed Type—* These are set into or recessed almost entirely into the walls, and cemented in place when the tile or other wall finish is put on. The greatest depth required in the wall is 3 $\frac{1}{4}$  in., except for F-180 radiator, which needs 5 in. *When used on tiled walls they should be included in the tile contract.*

Recessed fixtures that are 6x3, 6x6, 6x9 and 6x12 in. require little cutting of tile when set in 6x3 or 6x6-in. tile. All these fixtures can be set in 4 $\frac{1}{4}$ x4 $\frac{1}{4}$ -in. tile but it requires more cutting. All 4 $\frac{1}{4}$ x4 $\frac{1}{4}$ , 6x4 $\frac{1}{4}$  and 8 $\frac{1}{2}$ x4 $\frac{1}{4}$ -in. recessed fixtures are for use with 4 $\frac{1}{4}$ x4 $\frac{1}{4}$ -in. tile.

F115  
Built in Type-section

Methods of installation in various types of walls shown in sketches on following page.

*Semi-recess Type—* These fixtures recess into the wall but 1 in. and for this reason are admirably suited for installation in unusually thin partitions of all kinds. Also in circumstances where piping or other obstructions are found in walls of the usual depth or thickness. They are cemented in place and have a flange that overlaps the aperture, covering up the edges of the opening. This type of fixture is set as noted for Recess Type.

*Projecting Type—* In other respects their installation corresponds to the Biltin or Recessed Fixtures. They have special backs or wall attachments by which they are cemented to the wall.

These backs are of two kinds: "Back Shank or Dowel Type" and "Clincher" Back Type.

Where recessed fixtures are not desired, these projecting fixtures will be found adequate and very attractive as they have been designed with unusual care to improve on existing metal patterns and to meet the demands of modern bathrooms.

*Back Shank or Dowel Fixtures—* The depth required in the wall for this type is only 1 in. The dowels are heavy and strong and make a very substantial wall attachment.

*When Set in Tile Walls—* Usually set after the tile is in place. A hole corresponding to the shape, size and depth of the dowel, but slightly larger, is made in the wall. The dowel is then well covered with rich cement or plaster of paris and fixture pushed into place.

*Note:* Make holes in tile preferably at intersection of tile joints. Be sure hole is not too large to be concealed by fixture.

*When Set in Keene's Cement or Plaster Walls—* Hole is cut in wall and fixture pushed into place as for tile wall, but it is desirable that pieces of studding with their wide sides towards the front be nailed to studs (flush with face of studs) and the hole cut in the pieces of studding (see illustration).

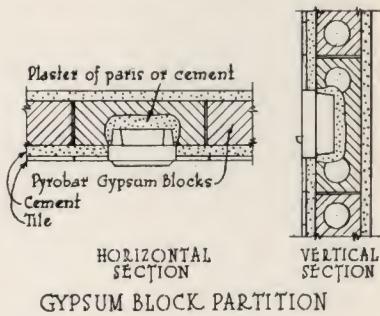

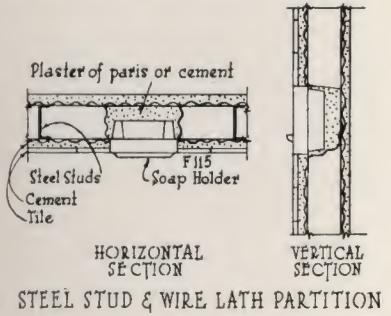

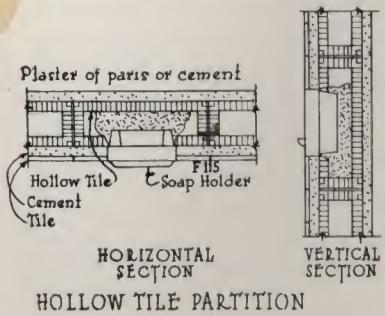

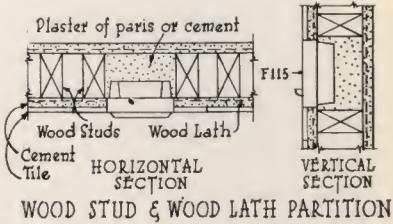

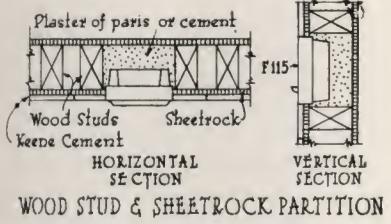

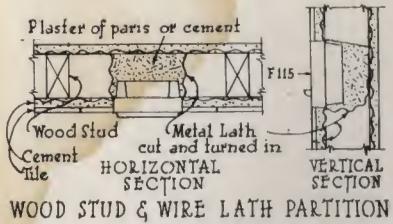

*Clincher Back Fixtures—* Made in tile sizes to avoid cutting the tile. They are cemented in place and the greatest depth needed is 3 $\frac{1}{4}$  in.

*When Set in Tile Walls—* Installed while tile is being set, or opening of proper dimensions may be left in tile work and fixtures set later. Make openings deep enough for liberal quantity of rich cement or plaster of paris and also cover the back of fixtures and fill the clinchers with the cement. Then push or tamp fixtures into place until glazed surface is flush with finished wall.

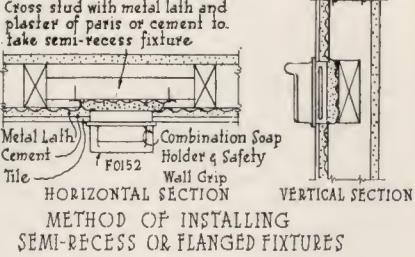

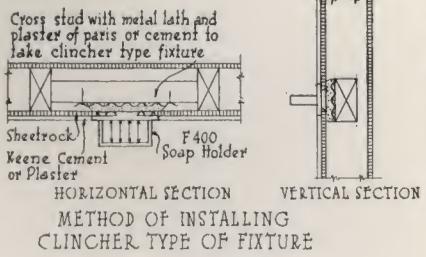

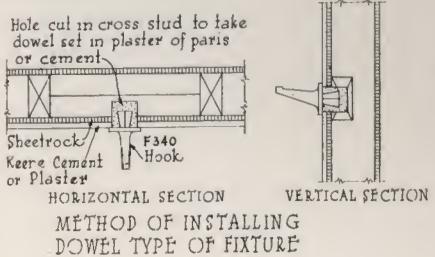

*When Set in Keene's Cement or Plaster Walls—* Set fixtures before applying finish coat to wall. Expose the lath where fixtures are to go and set as for tile walls.

*Note:* For walls with wood stud interior and sheetrock or plaster board bond, see illustration for method of preparing opening. After opening is prepared set fixtures as described for "When Set in Tile Walls."

## • INSTALLATION OF DOWEL, CLINCHER & SEMI-RECESS TYPE OF FIXTURE •

### Types of Fairfacts Fixtures and Methods of Installation in Various Kinds of Walls

On pages 17 and 18 are specifications of equipment suggested for residences of various total costs and for hotels, apartments, etc. Specifications for fixtures shown on page 14 appear on page 18.

*See Page 4 for Fixtures in Color*

# *Fairfacts Fixtures*

Fairfacts Accessories in black, in gold and in colors, similar to the colored tiles which you may select for your clients, are promptly manufactured after receipt of a sample of the tile from your tile contractor.

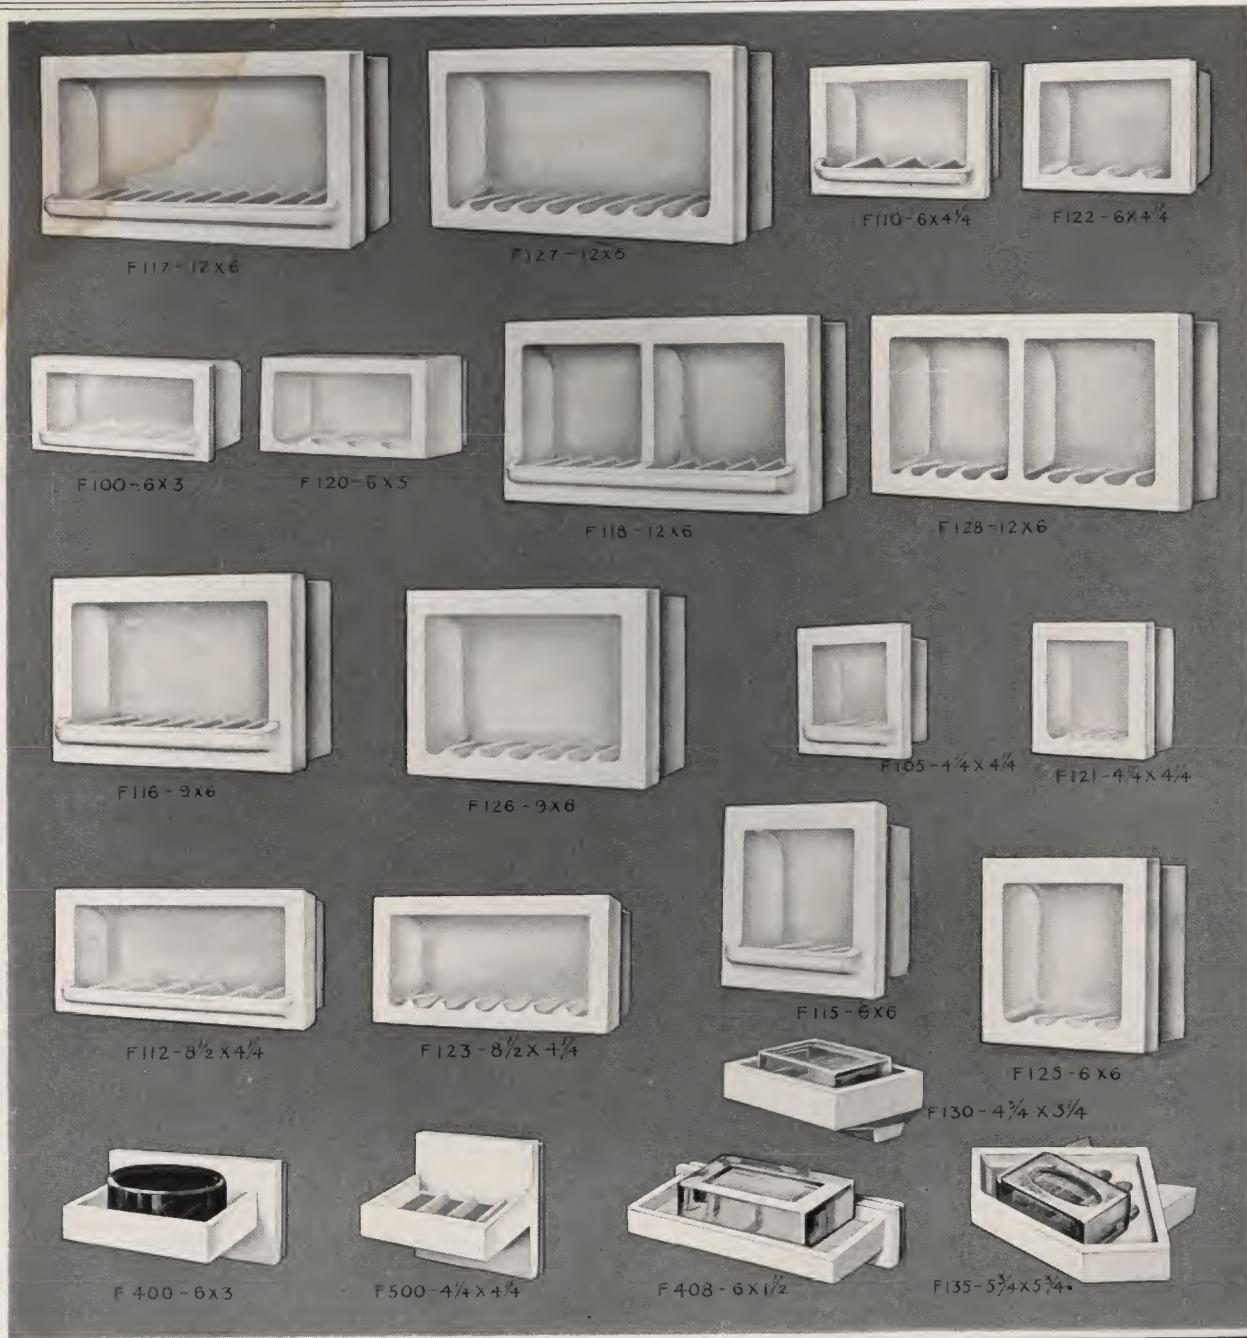

These black and gold and colored accessories are kiln treated and of the finest quality.

Black accessories of the commonly used patterns such as F 115 Soap Holder, F 160 Tumbler Holder, etc., etc., are carried in stock.

Metal accessories such as medicine cabinets, F 60 paper holders and screwed on metal hooks are finished in colors in baked enamel to harmonize with the colored china fixtures.

Square and round pyralin and glass towel bars and glass shelves are also furnished in black and colors.

| F-123 | 8 1/2 x 4 1/4 x 3     | Biltin Soap Holder, self drain |        |                       |                                       |

Note: Installation data on page 3; plan and elevations showing setting heights, also specifications and schedules of accessories on following pages. Above sizes are inches, horizontal, vertical and depth in the wall in the order given.

### Important when Selecting

Biltin Soap Holders having the front lip are the regular pattern. Because of the vertical opening very little water collects, and they need only to be cleaned as occasion demands. These soap holders really hold the soap; it does not slip over the edge down to the floor.

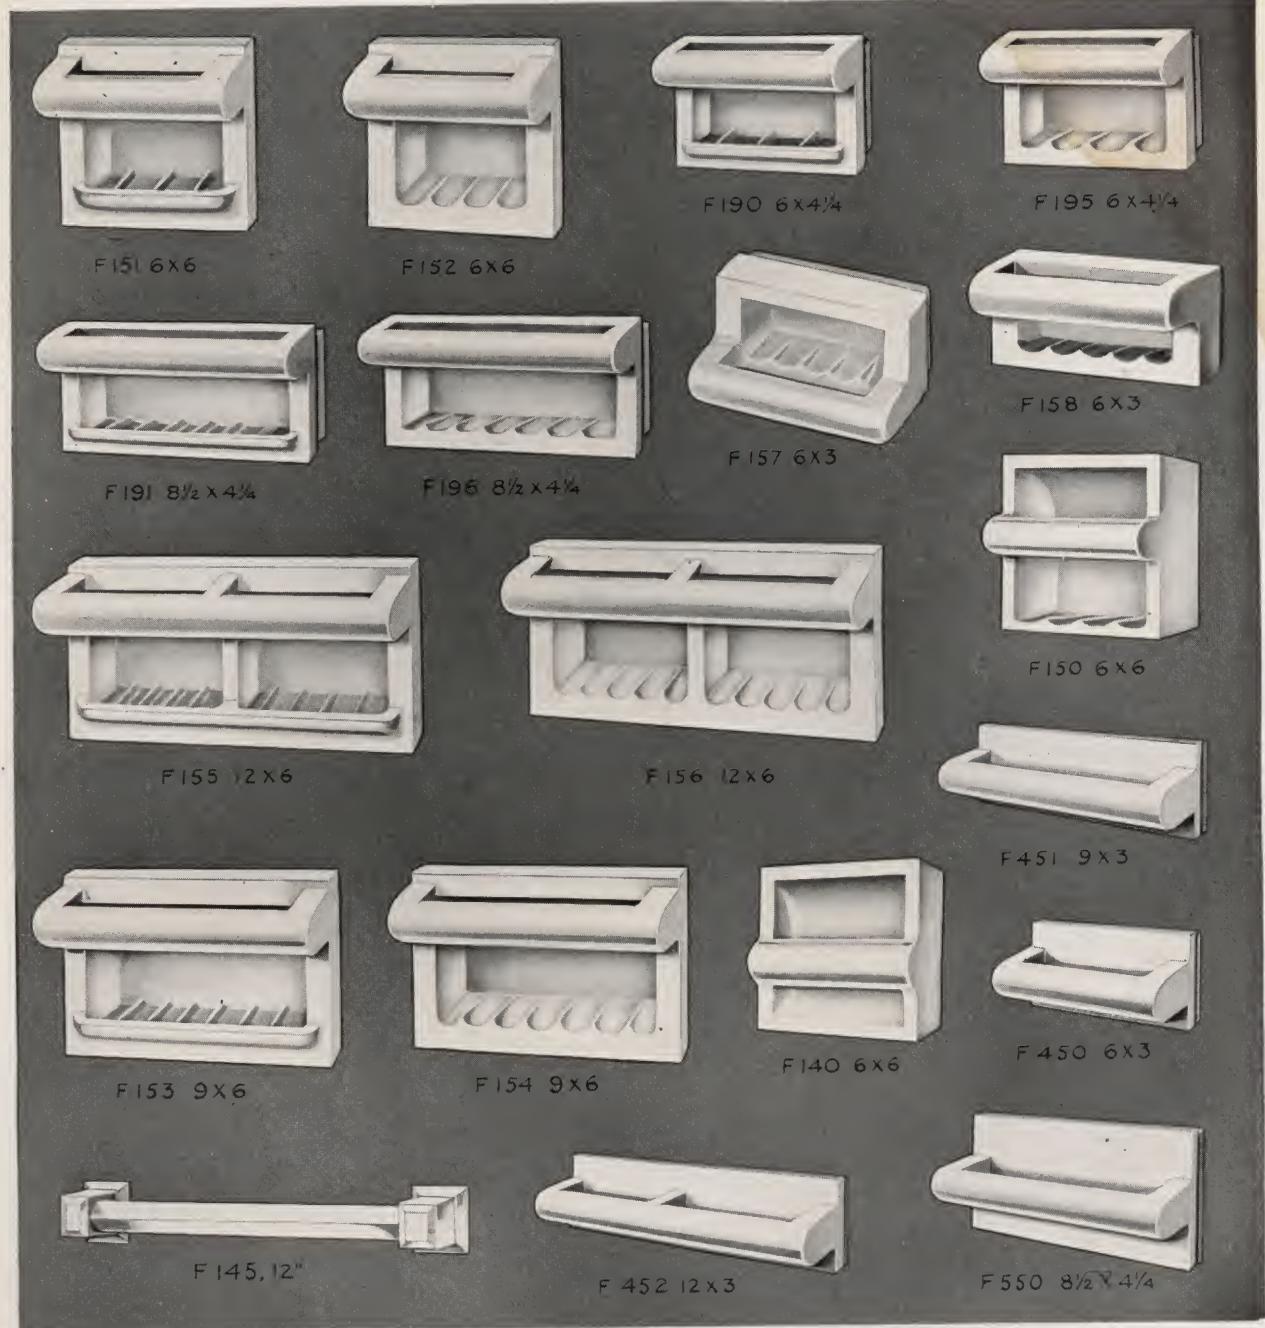

Biltin Soap Holders having the fluted base, self-draining type, are used with shower baths, over bathtubs or in shower compartments. The

\*Designed especially to go in the back corner of the tub near the faucets where it is out of the way, to hold soap brush or sponge. It is the extra fixture so often sorely needed.

self-draining feature prevents accumulation of water from shower, as the valleys slope toward the front discharging the water, and the soap supporting ridges slope backward, preventing soap from falling out.

Biltin Soap Holders larger than 6 in. are desirable where individuals in a family use different soaps; or for soap and sponge.

| F-150 | 6 x6 x3       | Biltin Combined Soap and Safety Grip, self drain | F-191 | 8 1/2 x4 1/4 x2 3/4 | Biltin Combined Soap and Grip, with lip   |
| F-151 | 6 x6 x2 3/4   | Biltin Combined Soap and Safety Grip, with lip   | F-195 | 6 x4 1/4 x3         | Biltin Combined Soap and Grip, self drain |
| F-152 | 6 x6 x3       | Biltin Combined Soap and Safety Grip, self drain | F-196 | 8 1/2 x4 1/4 x3     | Biltin Combined Soap and Grip, self drain |
| F-153 | 9 x6 x2 3/4   | Biltin Combined Soap and Safety Grip, with lip   | F-450 | 6 x3 x 3/4          | Projecting Safety Grip, clincher back     |
| F-154 | 9 x6 x3       | Biltin Combined Soap and Safety Grip, self drain | F-451 | 9 x3 x 3/4          | Projecting Safety Grip, clincher back     |
| F-155 | 12 x6 x2 3/4  | Biltin Combined Soap and Safety Grip, with lip   | F-452 | 12 x3 x 3/4         | Projecting Safety Grip, clincher back     |
| F-156 | 12 x6 x3      | Biltin Combined Soap and Grip, self drain        | F-550 | 8 1/2 x4 1/4 x 3/4  | Projecting Safety Grip, clincher back     |

Note: Installation data on page 3; plan and elevations showing setting heights, also specifications and schedule of accessories on following pages. Above sizes are inches, horizontal, vertical and depth in the wall in the order given.

### Important When Selecting

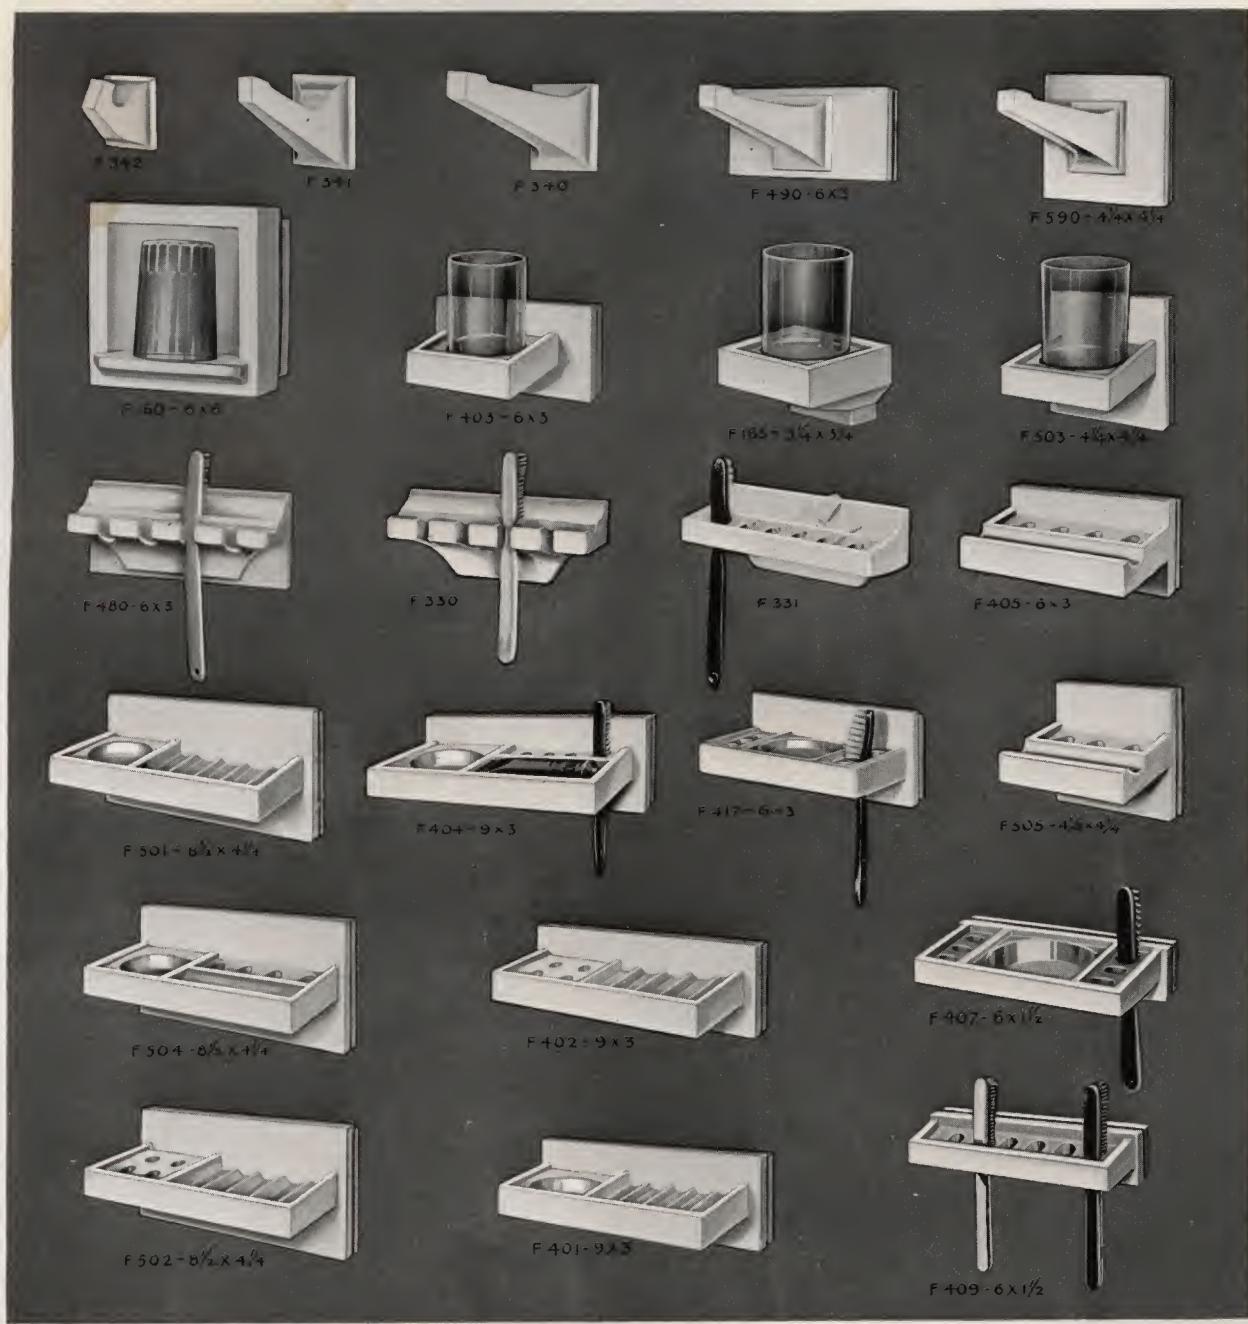

Accidents from slipping are avoided if the safety grip is used over the bathtub and in a shower compartment, and two grips for combination tub and shower. It safeguards the bather, the owner, the lessee. Combinations are largely used, for economy, in apartment and hotel

buildings. Separate pieces such as F-115 Soap Holder and F-140 Grip make a more practical residential installation.

Biltin combinations larger than 6 in. right to left are desirable when individuals in a family use different soaps, or for soap and sponge.

## SPONGE HOLDERS, COMBINATIONS AND TOILET PAPER HOLDERS

Biltin or Recessed Pattern and Projecting Pattern

### Dimensions and Condensed Description

Sizes are in inches, horizontal, vertical and depth in the wall, in the order given

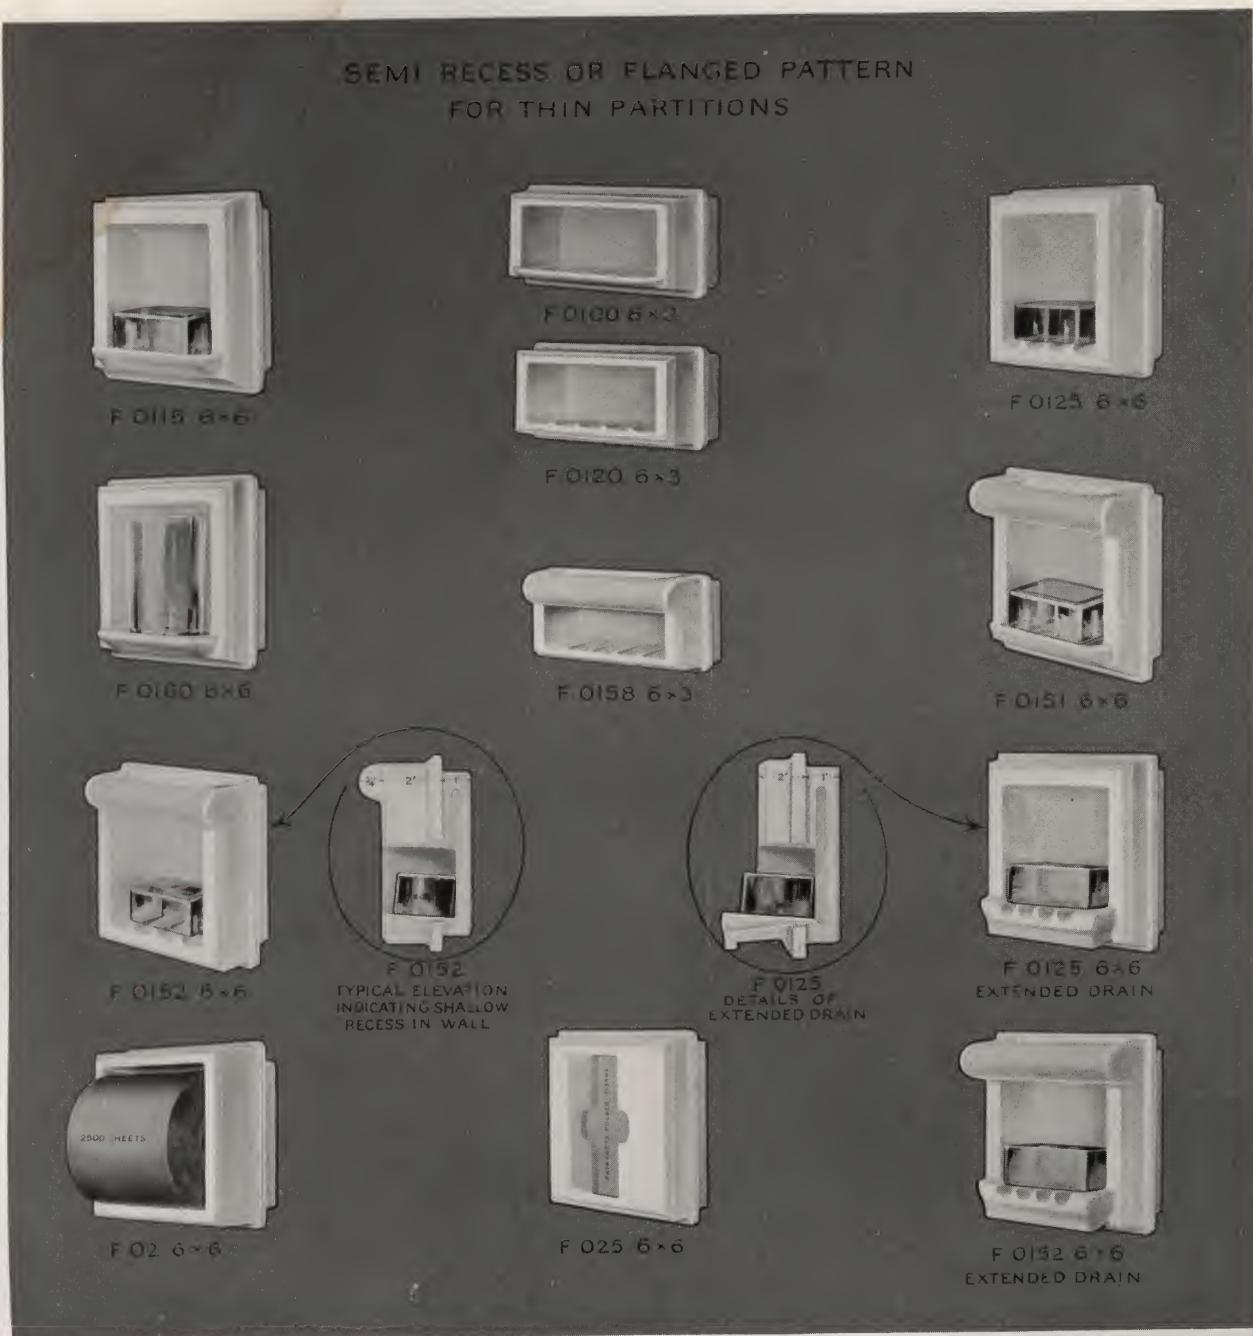

| NO.   | SIZE, IN. | Fixture  | NO.   | SIZE, IN. | Fixture   |
|-------|-----------|--|-------|-----------|---|
| *F-1  | 6 x6 x3½  | Biltin Roll Paper Holder, rewind roller<br>Hood protects paper from water. Holder projects only two inches from wall.  | F-119 | 12 x6 x3½ | Biltin Soap and Tumbler Holder, with lip                  |
| F-2   | 6 x6 x3½  | Biltin Roll Paper Holder, plain roller   | F-170 | 6 x6 x3½  | Biltin Sponge Holder                                      |
| F-12  | 6 x6 x3½  | Biltin Roll Paper Holder, plain roller   | F-171 | 12 x6 x3½ | Biltin Combined Soap and Sponge, with lip                 |
| F-25  | 6 x6 x2½  | Biltin Sheet Paper Holder, 1000 sheet capacity   | F-172 | 12 x6 x3  | Biltin Combined Soap and Sponge, self drain               |
| F-26  | 6 x6 x2½  | Biltin Sheet Paper Holder, 1000 sheet capacity<br>F-25 and F-26 accommodate special patented folded paper—readily obtained   | F-175 | 6 x6 x3   | Biltin Sponge Holder, with lip                            |
| F-30  | 9 x2½x1½  | Projecting Roll Paper Holder, plain roller   | F-410 | 9 x3 x ¾  | Projecting Roll Paper Holder, plain roller, clincher back |
| +F-60 | 8 x10½x3  | Biltin Sheet Paper Holder, heavy cast metal, white coated<br>Large enough for the largest sheets of toilet paper. Screwed to interior wood strips previously set by carpenter. | F-412 | 9 x3 x ¾  | Projecting Sheet Paper Holder, clincher back              |
|       |           |  | F-470 | 6 x3 x ¾  | Projecting Sponge Holder, clincher back                   |
|       |           |  | F-570 | 8½x4½x ¾  | Projecting Sponge Holder, clincher back                   |

\*Patented roller, illustrated, rolls up paper, preventing that annoying unwinding. Saves paper—only a few sheets can be unrolled at a time.  
Note: All projecting roll paper holders take the usual standard staple rolls of paper. Recessed paper holders accommodate rolls of paper containing 1000 sheets only. Rewind rollers require standard size pasteboard cores of, approximately, 1½ in. diameter inside usually found in rolls of 1000 sheets of paper.

Note: Installation data on page 3; plan, elevations, setting heights and schedule of accessories on following pages.

## See Page 4 for Fixtures in Color

These accessories are, in general, similar to the full recess type. They are put to the same uses. Their interior dimensions correspond to the same sizes in the full recess. They require the same holes or apertures in the wall, except that all these fixtures recess into the wall but 1 in. When cement is to be placed at back of fixtures, holes should be enough deeper to take the cement. These semi-recess fixtures overlap and cover the edges of the holes in which they are cemented. They are designed for installation in very thin walls or in all kinds of walls where pipes or other obstructions are encountered, and can be used with any size tile.

Special attention is called to F-0125 and F-0152 extended drain, which drains into the bathtub and away from the wall, thus filling an occasional demand. They really do what they are claimed to do. They have no dangerous spout to injure the bather.

F-02 Paper Holder will accommodate rolls of paper containing 2,500 Sheets.

F-025 accommodates special patented folded paper—readily obtained.

| Description     | Cat. No. | For tile | Dimensions  | Wall        | Wall           |

# Fairfacts Fixtures

## Fairfacts Pyralin, White or Crystal Glass Towel Bars and Glass Shelves

**Fairfacts Non-slip Towel Bars**—Are  $\frac{1}{8}$  in. square and are covered with heavy white sheet Pyralin. Are set edge up, affording three points of contact that keep the towels from slipping off.

**Fairfacts Round Bars**—Bars are 1 in. in diameter and can be furnished in either clear crystal or white glass, or in Pyralin finish.

| †48                           | F-300                       | *F-310  | F-600                                | F-430   | F-530                                |

\*Heavy bars  $1\frac{1}{8}$  in. square and large posts with dowels.  
†42 and 48-in. bars have center posts as well as end posts.

**Directions for Ordering**—All posts or brackets are of china and are made with either back shank or dowel or clincher back wall anchorage. Letter F alone before the series number designates the non-slip bars—as F-300. For white glass bars add the letter W to the non-slip catalogue number shown in table—as F-300W; for crystal glass bars add letter C—as F-300C; for Pyralin covered bars add letter P—as F-300P.

**Note:** Catalogue number shown in table is for non-slip bar. Add W, C or P for white glass, crystal or Pyralin round bars.

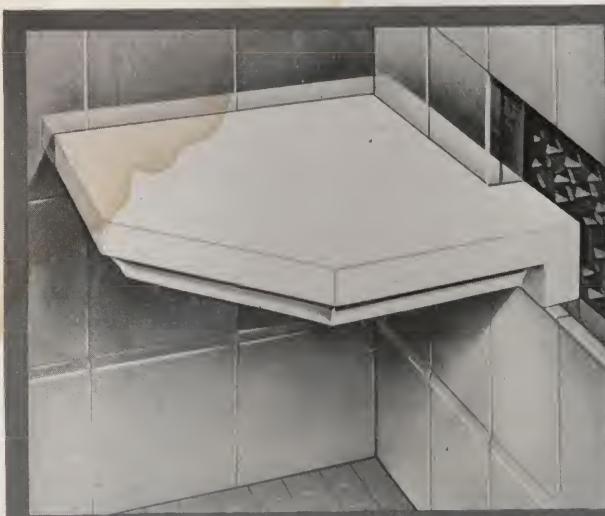

### DIMENSIONS AND SERIES NUMBER FOR ORDERING WHITE GLASS SHELVES

Shelves are 5 in. wide,  $\frac{5}{16}$  in. thick with china brackets. Shelves rest on or are bolted to brackets, as illustrated.

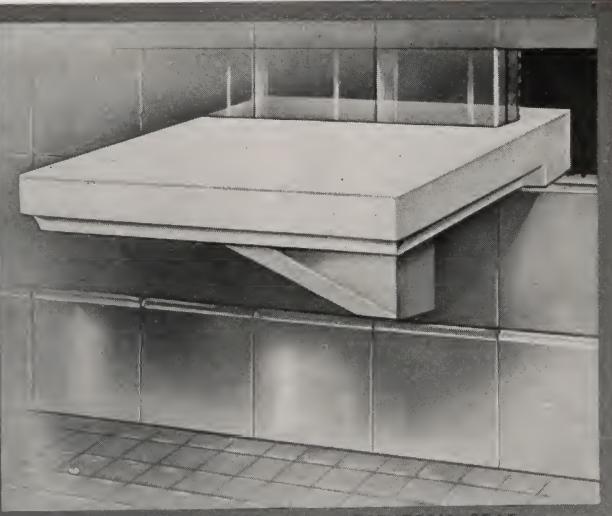

| Length over<br>all, in. | Back shank or<br>dowel type |                                      | Clincher back type |         |                                      |

F-685 - 15 x 15 - OVERALL BATHROOM SEAT

F-680 - 15 x 15 - OVERALL BATHROOM SEAT

F-180 - 15 x 23 - BATHROOM RADIATOR

## BATHROOM SEATS, RADIATOR, HOOKS, CIGAR RESTS, COMB AND BRUSH HOLDER AND DOOR STOP

| NO.   | SIZE, IN.   | FIXTURE                    |
|-------|-------------|----------------------------|
| F-685 | 15 x 15 x 3 | China Bathroom Corner Seat |

Not affected by bathroom conditions and takes little room. Upper surfaces slope towards the wall, making a very comfortable seat. Built with a large factor of safety and will support the heaviest person.

| NO.   | SIZE, IN.   | FIXTURE                         |
|-------|-------------|---------------------------------|
| F-680 | 15 x 15 x 3 | China Bathroom Seat and Bracket |

Has a deep groove in underside into which the heavy bracket is fitted. Both seat and bracket extend 3 in. into wall and have locking grooves for binding the cement.

These seats will last a lifetime in perfect condition.

| NO.   | SIZE, IN.   | FIXTURE                  |
|-------|-------------|--------------------------|
| F-180 | 15 x 15 x 5 | Biltin Electric Radiator |

Equipment includes 3 110-120 volt, 250-watt lamps, 3 china sockets, heavy galvanized outlet box, polished brass plate, extra heavy 250-volt, 20-ampere switch, with iron outlet box, china switch plate with white head

Note: Methods of installation in various types of walls on page 3; plan and elevations showing setting heights on following pages. Above sizes are in inches, horizontal, vertical and depth in the wall, in the order given.

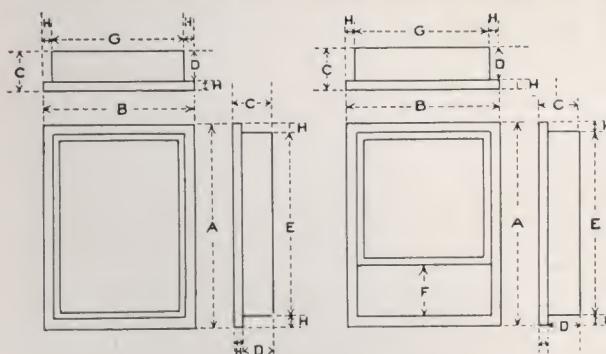

screws. Adequate wiring should be provided and the usual precautions against fire should be provided.

Heat in the bathroom is so often needed in the early morning or during the night when the regular heating plant is banked or shut down for the season, that the electric radiator is an absolute necessity for bathroom comfort during these periods. The average bathroom can be heated in from 5 to 10 minutes at a cost of about three cents.

| NO.   | SIZE, IN.           | FIXTURE   |
|-------|---------------------|---|

DIMENSION DIAGRAMS OF MEDICINE CABINETS  
SERIES F-1000, F-2000, F-3000, F-4000, F-5000, F-6000, F-8000  
Sizes and Dimensions as Shown in Diagrams

The fine quality cabinets illustrated above and on page 13, the series F-8000, the access cabinets, the mirrors series F-9000 and the mirror with shelf below, series F-9300, are described as follows:

Heavy pressed steel, gas welded, corners filed smooth, oven baked enamel finish, polished plate glass mirrors, crystal glass shelves where shown.

Mirrors can be furnished without bevel, and shelves can be white glass if desired.

Shelves are supported on polished aluminum brackets. These brackets fit into sockets in the sides of the cabinets having oven baked enamel finish, which provide a wide adjustment of the shelves up and down. A special feature of the brackets prevents the shelves from tipping.

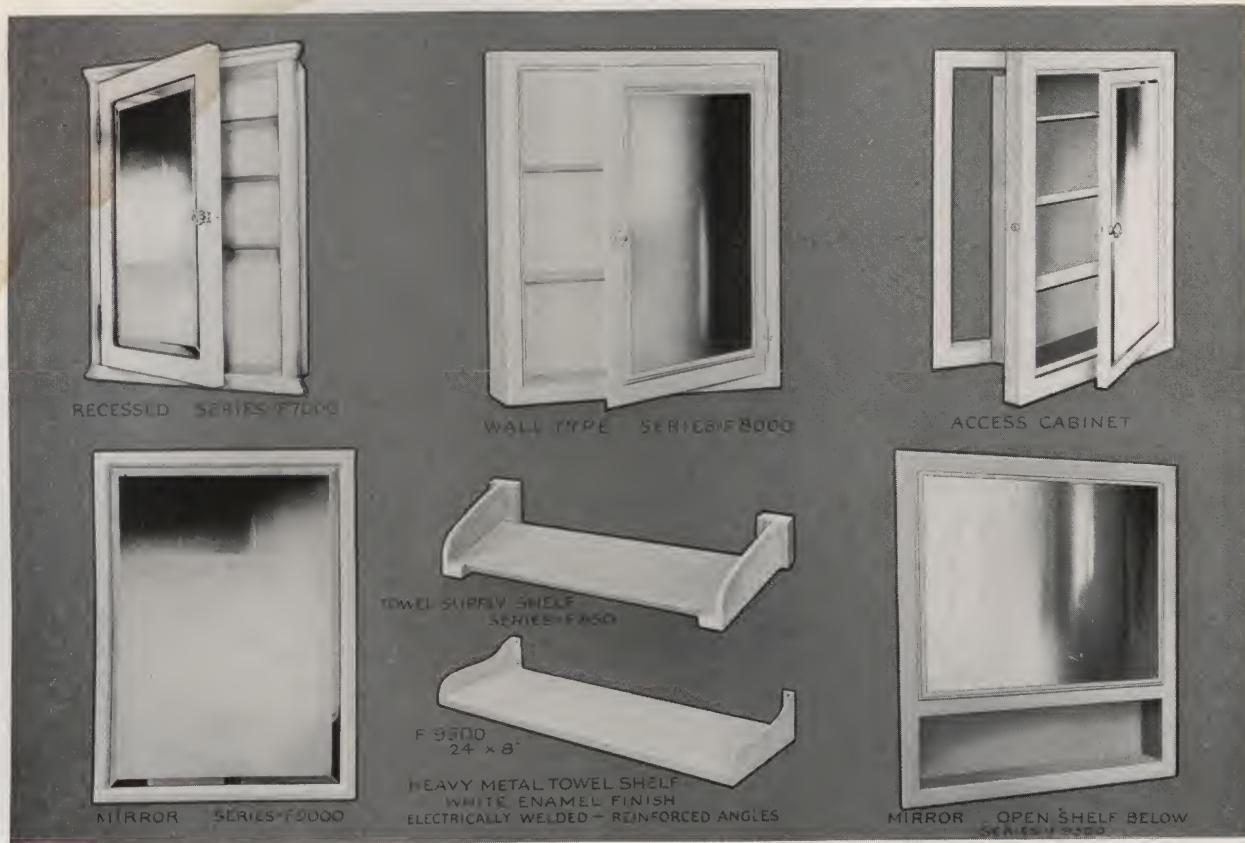

The doors have substantial hinges, with oven baked finish, glass knobs and bullet friction catches.

## MEDICINE CABINETS, MIRRORS, MIRROR WITH SHELF AND TOWEL SUPPLY SHELVES

Series F-7000 Medicine Cabinets are of the finest quality and designed for high-class residential use. They are made of seasoned wood and covered with sheet Pyralin that will not crack or chip or flake off, that is moisture proof and has a beautiful finish. Hinges and shelf brackets are nickel-plated. The balance of the equipment is as described for steel cabinets on page 12.

Wall Cabinets series F-8000 have screw holes in back for attaching to wall. Otherwise they are like cabinets described on page 12.

Access Cabinets are like cabinets described on page 12 except that they have an extra frame to which the cabinet is hinged. This cabinet, when swung open, gives access to pipe shafts, etc., when repairs are necessary. The cabinet is held in closed position by screwdriver lock device. See details on page 12.

Mirrors with open shelf below are fully shown in the illustration and vertical or horizontal. See page 12 for general description.

Mirrors with open shelf below are fully shown in the illustration and line drawing.

Towel supply shelves for use in hotels, hospitals, etc.

F-850 is, perhaps, the most attractive and sanitary towel supply shelf obtainable. The glass shelf rests in solid china brackets that hold it securely so that it won't slip off. The brackets are screwed to the wall and the screws are concealed by china buttons.

F-9500 is an economical towel supply shelf, made of heavy steel having oven-baked enamel finish.

## TOWEL SUPPLY SHELVES TO SCREW TO WALL

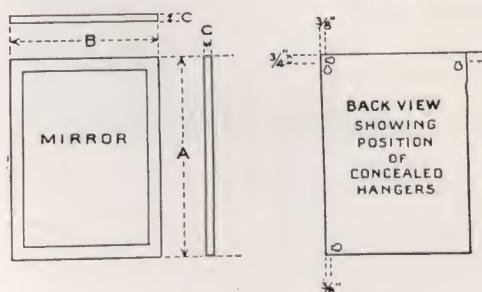

**F-850**—White Glass Towel Supply Shelf,  $6\frac{3}{4}$ " wide, lengths 20", 24", 26", 28"

**F-9500**—White Enamelled Steel Towel Supply Shelf, 8" wide, length 24"

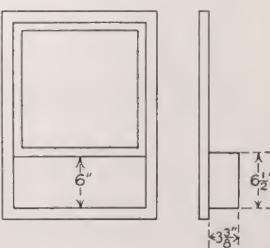

## MIRRORS WITH OPEN SHELF BELOW

Series F 9300, Dimensions of Sizes most commonly used.

Also made in special sizes to meet specifications.

| Code No. | Size Overall                         | Size Mirror | Depth in Wall  |
|----------|--------------------------------------|-------------|----------------|
| F-9300   | $15\frac{1}{2} \times 26\frac{3}{4}$ | 12x16       | $3\frac{3}{8}$ |
| F-9301   | $19\frac{1}{2} \times 22\frac{3}{4}$ | 16x12       | $3\frac{3}{8}$ |
| F-9302   | $17\frac{1}{2} \times 28\frac{3}{4}$ | 14x18       | $3\frac{3}{8}$ |
| F-9303   | $21\frac{1}{2} \times 24\frac{3}{4}$ | 18x14       | $3\frac{3}{8}$ |
| F-9304   | $19\frac{1}{2} \times 20\frac{3}{4}$ | 16x20       | $3\frac{3}{8}$ |
| F-9305   | $23\frac{1}{2} \times 26\frac{3}{4}$ | 20x16       | $3\frac{3}{8}$ |

## SOME PRACTICAL APPLICATIONS OF FAIRFACTS ACCESSORIES

Illustrations above give application of Fairfacts accessories to wash-basin, bathtub without shower bath, bathtub with shower bath, kitchen sink and toilet. The arrangement is the result of long experience. By counting the 6x6 or 6x3 in. tiles, exact locations may be determined.

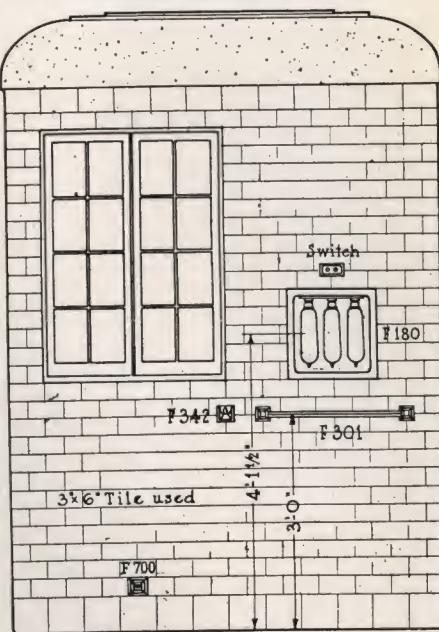

Dimensions and description of fixtures on preceding pages. Sectional views and methods of installation in various types of walls, on page 3. Plan and elevation of setting heights, architects' specifications and suggested schedule of accessories for various types of buildings on following pages.

## TYPICAL BATHROOM SHOWING FAIRFACTS ACCESSORIES

### Suggested Standard Specification

**Bathroom Accessories**—(1) The tile contractor shall furnish and set China Bathroom Accessories as manufactured by THE FAIRFACTS CO., INC., New York, N. Y., in accordance with the subjoined specification and schedule of accessories.

(2) **Setting Biltin (Recessed Type)**—(a) In stud and metal lath partitions, cut the metal lath across the top of the opening and down the two sides; bend the flap back to form a shelf and fill the space around the opening with excelsior bound together with plaster of paris to form a pocket; then set the piece in rich cement in the same manner that tile is set. (b) In masonry partitions, cut pockets and fill up any openings to prevent the escape of cement when setting.

(3) **Setting Semi-recess Type and Projecting Fixtures, Both Clincher Back and Dowel Back**—To be set while laying the tile or after it is laid.

Cut hole of sufficient size to receive the backs and set in rich cement mortar.

(4) **Location**—Accessories shall be set as shown on drawing or as will be directed by the architect. Care shall be taken to locate tile joints in such manner that accessories will center over fixtures without the unnecessary cutting of tile.

**Note:** In setting electric radiators, all wiring to be furnished and set by electrical contractor (see electrical wiring specifications).

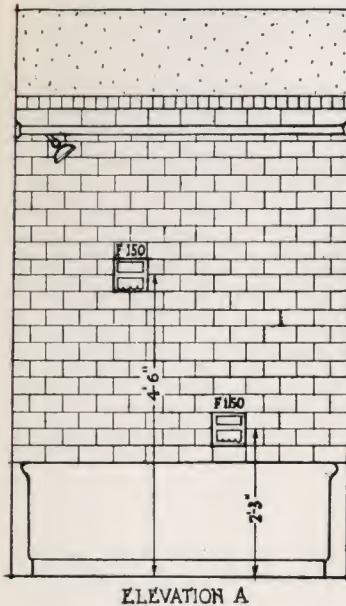

### Schedule of Bathroom Accessories

**Note:** Architect to add here the specific list of fixtures. Suggestions covering various types of residences, apartments and hotels are given on the following pages.
